Work experience

09/2018 - Now	12/2019- Now
Table of Mendeleev (mendel-info.usite.pro) Administrator	**Maybebaby project (www.geekbrains.ru)** junior Vue.js developer

Portfolio

News portal
github.com/IvanShavliuga/vuejsnews
News portal using vue technologies .js and css, bootstrap. This project is a simple social news network. The project was created specifically for self-learning. Implemented groups, users, news feed, the ability to edit material and create groups, as well as send messages, put likes, comments and reposts. I will be happy if you find errors in the code.
Html5 **C**ss3 **S**css **V**ue.js (2.x)   **V**ue-Router   **V**uex **N**pm **W**ebpack **B**ootstrap (4.x)   **E**cmaScript (2015)   **G**it **A**daptive design

Task manager and timer
github.com/IvanShavliuga/vuejsnews/vuejstimer
News portal using vue technologies .js and css, bootstrap. This project is a simple social news network. The project was created specifically for self-learning. Implemented groups, users, news feed, the ability to edit material and create groups, as well as send messages, put likes, comments and reposts. I will be happy if you find errors in the code.

Html5　**C**ss3　**S**css　**V**ue.js (2.x)　　**N**pm **W**ebpack　**E**cmaScript (2015)　　　**G**it
Adaptive design

Chat
github.com/IvanShavliuga/vuejsnews/vue-chat
Multi-user Chat for exchanging short messages using some html tags
Html5　**C**ss3　**L**ess　**V**ue.js (2.x)　　**N**pm **W**ebpack　**E**cmaScript (2015)　　　**G**it
Adaptive design　　　**O**wn design

Vue.js mail application
github.com/IvanShavliuga/vuejsnews/vuejs-mail-app
Just a project for self-learning vue.js technology. Development of a multi-user
mail application (only frontend parts) for your own needs and learning vue.js for
further professional growth as a specialist. The project must switch between
users and be able to add new ones). It should be possible to send messages to
spam, and forward messages between users.
Html5　**C**ss3　**B**ootstrap (4.x)　　**V**ue.js (2.x)　　**N**pm **W**ebpack　**E**cmaScript (2015)
Git **A**daptive design　　　**O**wn design
